MONTECATINI INTERACTIVE MEDICINE INTERNATIONAL

CLINICAL CASES IN GASTROENTEROLOGY & HEPATOLOGY

1969-2019 50 aigo

"Montecatini Interactive Medicine International (MIMI)-V" is the continuation of the MIMI I-IV meetings previously organized in Montecatini Terme (PT, Italy) every two years from 2005 to 2011. MIMI-5 will maintain its classic format, as it was in Andrew K Burroughs' original genial intuition of an interactive update meeting for young trainee doctors based on the strong collaboration between our Gastroenterology Unit in Italy and the UCL Institute for Liver and Digestive Health (Royal Free Hospital, London, UK) headed by Prof. Massimo Pinzani. It is a fortunate coincidence that 2019 celebrates AIGO (Associazione Italiana Gastroenterologi ed Endoscopisti Ospedalieri) 50th anniversary, and we are very proud that MIMI-V was selected as one of the "gold" events by the AIGO-50 States-General, with the attendance of all the major national representatives.

The meeting will be patient-based. Achieving good patient compliance and his/her full involvement in decision-making is essential to integrate the aims of developing new clinical pathways and of enhancing the patient/doctor collaboration, evolving towards a new concept of "Value-Based Medicine". With this mentality, a series of clinical cases will be discussed by a panel with the active participation of the audience. There will be also some lectures from international experts on topical subjects in gastroenterology and hepatology in addition to the cases, and some face-to-face sessions which will complement the general philosophy of the meeting. We are extremely happy to welcome you all again in Montecatini Terme.
